

Yates' Hand-Picked Seed Potatoes

The bags we send out are all stencilled "YATES' HAND-PICKED SEED POTATOES," and customers should see that the bags they get are so branded, otherwise they were not sent by us. It is quite impossible to guarantee Seed Potatoes to be free from the spores of Irish Blight, and the crop should be regularly sprayed where Blight conditions are prevalent. This season a great many samples which would be otherwise suitable for seed are more or less badly affected with Potato Fly. Knowing this, we are exercising every care to select samples that are free from this pest, and in addition every line is hand-picked in our own warehouse, outsized and diseased tubers being thrown out. Tubers of nice seed size have been very scarce, owing to the heavy season, but we have spared no effort to obtain the most suitable.

Potatoes should be planted for early use as soon as the frosts are over. A few may be planted rather earlier, as it is worth running some risk to get early potatoes. Open drills about 30 inches apart and six inches deep. If possible, put in this drill a layer of well rotted stable manure, a dressing of some potash manure is also very beneficial. Potatoes up to two or two-and-a-half inches should be planted whole, those larger may be cut, care being taken to leave two eyes at least on each set. Plant the tubers about 12 inches apart in the rows. As soon as through the ground, keep the soil cultivated, and when plants are about six inches high they should be earthed up by throwing the soil towards the rows.

CUSTOMERS, NOTE!

PRICES—Owing to fluctuations in Market Value of Potatoes, we must reserve the right to vary prices without notice. We can quote definitely by return of mail for any lines required. Customers when asking for a quote should mention quantity required and when they wish them supplied. **We Quote Special Prices for Ton Lots.** To assist planters, we will, if sold out of variety ordered, substitute a variety similar in season and type, and one which we consider should give satisfactory results. If customers do not desire this, please instruct. "Do not substitute."

ORDERS FROM OTHER STATES—In connection with interstate orders, we can only supply on the understanding that our responsibility ceases when a clean certificate has been obtained from the Department of Agriculture, Sydney. Customers in other States, when ordering Seed Potatoes, are requested to advise us that they agree to this condition.

TERMS—The prices of all Seed Potatoes are Nett Cash.

DELIVERY—We Deliver Free on Rail or Steamer, Sydney, after which they are at the risk of the purchaser.

Delivery within the Suburban Area of Sydney is charged extra at the following rate: 28 lbs. and under, 9d.; 56 lbs. and under, 1/-; 2/- per cwt.

ALL SALES ARE MADE ON THE FOLLOWING CONDITIONS OF SALE AND NON-WARRANTY.

We believe that all Seeds Bulbs and Roots sold by us are of the description and kind specified by us at the time of sale but owing to the practical impossibility in many cases of being certain of this we give no undertaking that such Seeds Bulbs or roots will correspond with the description under which they are sold and we make all sales subject to this condition. We further give no warranty expressed or implied as to their growth description quality or productiveness and will not be in any way responsible for the crop. If the purchaser does not accept the goods sold to him on these terms they are at once to be returned to us and any money paid to us will be refunded.

Letters :— Box 2707-C, G.P.O.

New and Choice Early Varieties of Yates' Hand-Picked Seed Potatoes

The following are new early varieties which should be of great interest to potato growers. They are good clean samples of a nice size for planting. Owing to limited supplies not more than 28lbs. can be supplied of any one variety.

DUKE OF YORK

One of the earliest good croppers yet grown. A fine kidney shaped variety with a vigorous, hardy constitution. This sort should be very popular when it becomes known.

EARLY PURITAN

This is a variety which will crop consistently under variable conditions, and comes in splendidly for early market and main crop. It is a white, oval potato, and excellent for table use.

SHARPE'S EXPRESS

ARRAN ROSE

In some districts earlier than Early Rose, this is a bright pink, oval, medium size sort, with smooth skin and shallow eyes. Under good favourable conditions it is a very fine cropper, and has shown itself resistant to Wart Disease. Supplies very limited.

EPICURE

This potato has done extremely well on the southern highlands, and has earned quite a name in the local markets. It is a round variety of excellent eating quality, and strongly resembles Up-to-Date, but is considerably earlier.

CRUSADER

This variety matures between Sharpe's Express and Up-to-Date. It is of good size, thick, kidney shape, and cuts well, and has proved to be a really good cropper. This sort, like Arran Rose, is recommended as being very resistant to Wart Disease.

ECLIPSE

SHARPE'S EXPRESS

A very early dwarf growing variety, kidney shaped, and one which should be eminently suitable for the suburban garden, where there are usually favourable conditions. They are very true and even, and will give a heavy crop.

ECLIPSE

Another variety which resembles Up-to-Date, but which is earlier, and gives a higher percentage of saleable tubers. It is of the round kidney type, and a fine cropper.

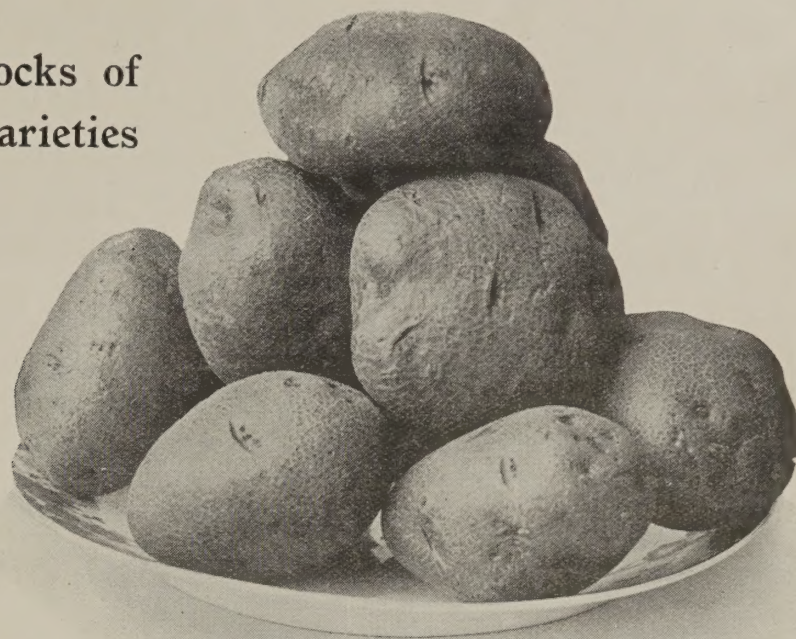

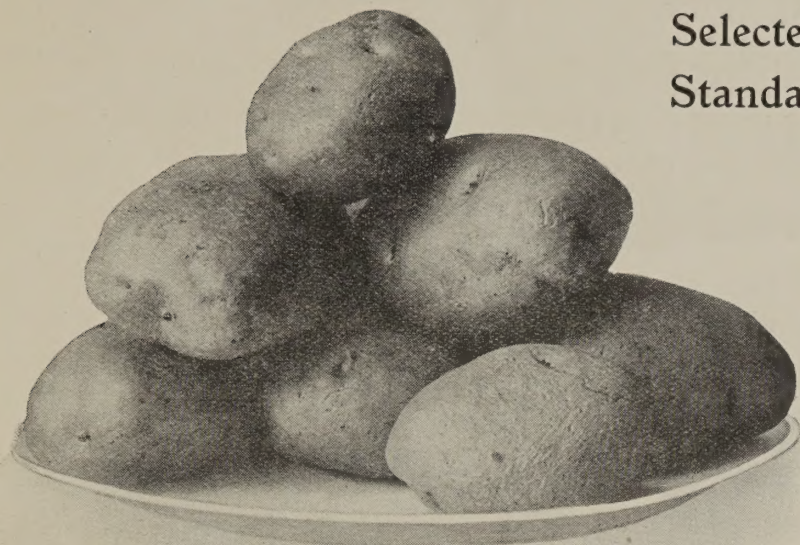

EPICURE

PRICES : Supplies very limited.

Yates' Hand-Picked Seed Potatoes

Selected Stocks of Standard Varieties

EARLY MANISTEE

EARLY MANISTEE—This has proved perhaps the best of the Early Varieties. It has a pink-brown skin, is of fine flavour, and boils dry. One of the heaviest croppers in the early section. It is yearly becoming increasingly popular, and has been found a suitable variety for light land.

EARLY ROSE—Well known as one of the earliest Potatoes grown, and one of the best for early use if grown on suitable well drained land. A good boiling variety, but its principal merit is its earliness and its suitability for our warmer districts where there is only a short growing season, and where it always yields fair crops.

EARLY VERMONT—Very similar to the Early Rose, the tubers being longer, not so smooth, and with more prominent eyes; good cropper, and quite as early as that variety. Often called American Early Rose.

EARLY MANHATTAN—One of the heaviest yielding main crop varieties we have. A good cooking sort, firm white flesh, shallow eyes, and mottled blue and white skin. A handsome shapely potato, well suited to the Sydney market.

CARMEN—Fairly Early Variety. Heavy cropper, flat oval tubers, shallow eyes, uniform in size and shape, and boiling floury.

SATISFACTION—A pink skinned round variety, largely used in our coastal districts. It is one of the best keepers. Flesh white, boils dry, shallow eye.

ADIRONDACK—Main crop. One of the best keepers we have. The tubers are round, inclining to flat, with pink netted skin. They boil well and will give good crops in a suitable season, and in cool moist climates, where they have a long growing season. They are good croppers.

BROWNELL'S BEAUTY—A favourite main crop potato in New South Wales. It is a consistent cropper, and seems to do well alike in both hot and cold districts.

TASMANIAN BROWNELLS—A white fleshed main crop potato. It is a consistent cropper, and seems to do well in a wide variety of districts.

FACTOR—A variety which is gaining favour in the late maturing section. The tubers are flat oval, somewhat resembling Up-to-Date. The skin is white.

UP-TO-DATE—A good general purpose potato. The tubers are of good size and shapely, with shallow eyes and white skin. Does very well in the cool, moist districts, and is also a favourite with market gardeners in Sydney and similar climates for their supplies of "new potatoes."

Plant now also—

RHUBARB ROOTS—The following comprise the best and most popular varieties. Owing to seasonal conditions Rhubarb and Asparagus Roots are not as large as usual. As postage is extra on all orders for roots small roots are recommended for mail orders.

Cherry Red—A fine sort; producing an abundance of rich cherry colored stems of excellent flavor. After trying this out for some years we place it in the forefront for the home garden. Its beautiful color when properly cooked, its flavor and its tenderness are unequalled. Roots, 1/6 each, 15/- dozen.

Topps' Winter—A variety bearing the heaviest crop in the early winter, but can be pulled all the year round. Both this and the next variety are recommended for the home garden. Roots per dozen, small, 5/-; medium, 7/6.

Sydney Crimson—Similar to Topps' Winter. This variety is extensively grown in Sydney market gardens, and like Topps' Winter is a splendid all the year round sort. Roots per dozen, small 5/-; medium, 7/6.

Victoria Giant—The largest and best for summer use, dies down in winter months. Roots per dozen, small, 5/-; medium, 7/6.

ASPARAGUS—Almost everyone is fond of this delicious vegetable but few care to grow it from seed. Now is the time to put in established roots and so save the long period necessary to bring them to this stage. We strongly recommend young plants, not large three-year-old roots; these latter take longer to establish themselves, and there is really no time gained.

Connover's Colossal—The old standard variety; large heads. Postage extra on all orders. One year roots only, per doz. 2/-, per 25 3/9, per 100, 12/6.

CHOKOS—A tender marrow-like vine, only suitable for warm climates. (Sold out).

GARLIC—When planting pull the bulbs to pieces and sow the cloves or sections six inches apart in shallow drills. Cultivate the same as Onions. 1/3 lb. Postage extra.

SWEET POTATOES—Few vegetables are nicer than lightly baked Sweet Potatoes. We have the hardy white skinned variety, a heavy cropper. 4d. lb.; 28 lbs. and over 3½d. lb. Postage or freight extra. Rooted Cuttings available October, November, 1/- doz.; 7/6 100; 60/- 1000. Postage extra, 6d. per doz.; 1/- per 100.

JERUSALEM ARTICHOKEs—A very well-known vegetable and quite a favourite with many people. Cultivate in the same manner as Potatoes. At time of going to press supplies are almost unprocurable. Per lb., 3d.; 28lbs., 4/3. Post or Freight extra.

SPRAYS AND SPRAY PUMPS

ALL POSTAGE OR FREIGHT EXTRA.

The following are the most generally used sprays. Many of them are poisonous—keep protected from children and animals. When spraying Potatoes for Blight, 1lb. of Bordeaux Powder will be sufficient to cover about 500 square feet. For safety we advise three sprayings at intervals of about three weeks.

RELIABLE ARSENATE OF LEAD.

Quite the most useful spray for leaf-eating insects. In Paste Form (1 lb. making up to 30 gals. spray), in tins, 1 lb., 2/6; 2 lb., 4/6.

In Powder Form (1 lb. making up to 50 gals. spray), ¼ lb., 1/-; 1 lb., 3/6.

YATES' "HAROLA" LIME SULPHUR.

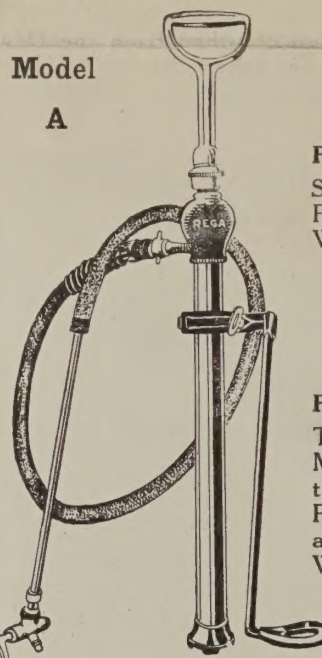

A great mixture for scale and fungus. (1 gal. makes 10-40 gals. spray, according to purpose required). In sealed tins, 1 pt., 1/3; 1 qt., 1/9; ½ gal., 2/-; 1 gal., 3/6; 2 gals., 6/6; 4 gals., 8/-; 5 gals. drums, 10/-; 42 gal. casks, 1/9 per gal. (casks 7/6 extra, returnable).

"RELIABLE" BORDEAUX MIXTURE.

A reliable fungicide and best for Irish Blight on Potatoes. (1 lb. makes up to 10 gals. according to purpose required.) Powder—per ¼ lb., 9d.; per 1 lb., 2/-; over 10 lbs., per lb., 1/9.

HARBAS—EXCELLENT FOR SCALE.

(1 lb. makes 20 to 30 gals. spray). In tins. Per 1 pint, 1/6; 1 quart, 2/3; ½ gal., 3/6; 1 gal., 6/-; 2 gals., 11/-; 4 gals., 17/-; 42 gal. casks, 4/- per gal. (casks 7/6 extra, returnable).

The "Rega" Sprayer

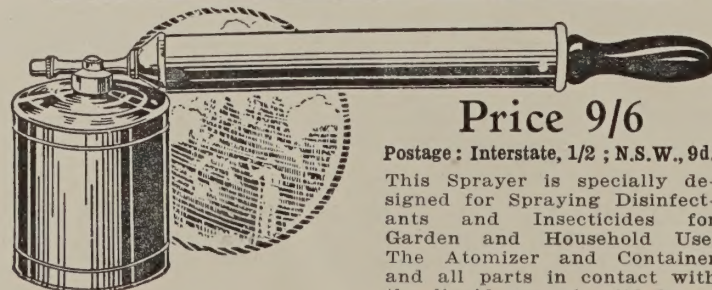

Model A - 27/6

Postage: Interstate, 3/8; N.S.W., 2/-
Suitable for the Garden, Small Orchard, Poultry Farm, Garages, Lime and Whitewashing, etc., etc.

Model B - 25/-

Postage: Interstate, 3/2; N.S.W., 1/9
This Model is a little smaller than the Model A, and manufactured to meet the need for a cheaper Pump. This Pump has the same effective power and is equipped with the Patent "All Ways" Spray Nozzle.

THE "REGA" CONTINUOUS ATOMIZER

Price 9/6

Postage: Interstate, 1/2; N.S.W., 9d.
This Sprayer is specially designed for Spraying Disinfectants and Insecticides for Garden and Household Use. The Atomizer and Container and all parts in contact with the liquid are of solid brass.
